Search architecture

Gemini · Root chat

How should we design search for our docs? Compare a few approaches.

ASSISTANT

Start with hybrid search.
Combine exact keyword matches with semantic retrieval.

1. **Vector search** for intent
2. **Reranking** for relevance

Embeddings

Vector search deep dive

Claude · Branched from Search architecture

Let's explore embeddings. How do we measure similarity?

ASSISTANT

Use cosine similarity.
Embed each document and query into the same vector space.

```
cos(θ) = (a · b) / (‖a‖ ‖b‖)
```

Ranking

Ranking & evaluation

OpenAI · Branched from Search architecture

How do we combine keyword and vector results?

ASSISTANT

Reciprocal rank fusion (RRF)
Merge both ranked lists without normalizing their raw scores.

Start with k = 60, then evaluate on real queries using NDCG@10.
